

GRIP® Film

Ergonomic & Lightweight

Allows you to wrap quickly and effectively whilst reducing fatigue through its ergonomic and lightweight design.

Quick Release & Twist-Lock

The unique combination of the notched film roll and Twist-Lock retention mechanism facilitates rapid roll changes.

Easy One Hand Application

GRIP®'s lightweight characteristics enable wrapping close to the ground without bending, and reaching high without operator strain.

Self-Gripping Stretch Film

The GRIP® skid-plate lets you get low to grab those corners and doubles as a handy base meaning your GRIP® is always ready for action.

Industrial Rack Mount

We even have a universal GRIP® hook that you can fix to racking systems or walls so you always know your GRIP® is ready for action.

Code	Description	Pack Qty	Outer/Pallet Qty
